1. Gábor Barna, the head of the WG congratulates those who are interested in the meeting and introduced the history and current focus of the WG.
2. The participants introduce themselves shortly. (Which institutes they are belong to?, Why they are interested in the topic?)
3. Discussion starts about the future plans and the possibilities of cooperation with main suggestions: WG should focus on both non-urban (rural) and urban places and spaces in past as well as in present; not only material spaces and places should be studied but also places of/in memory and imagined places; a cooperation with human geographers and/or architects could be fruitful; a new conceptualization, comparative study and discussion on new technical means (especially GIS) is needed in the traditional field of ethnocartography.
4. Gábor Barna resigns his position and new board has been elected. The participants elects two co-chairs, namely Jiří Woitsch and Jelka Vince Pallua and one secretary, namely László Mód.
5. The new board of SIEF Space-lore and Place-lore WG plans to organize conferences regularly (in the years between SIEF congresses) and prepare panels for the SIEF congresses.
